

Hutchins 2021

Early Childhood development and Preschool updates.

Early Childhood development.

Our most recent program has become so successful we have had to adopt a new strategy by creating cell groups. COVID has allowed us to adapt so we changed our large group settings to virtual meetings as well as personal home visits, and our attendance is exploding!

Missions Teams:

Missions Teams are already signing up for this summer! Our goal is to create discipleship opportunities for motivated teams. We are excited to announce that we are open and receiving missions teams June and July. The COVID entry requirements into Costa Rica are very simple because Costa Rica is very tourist friendly. We look forward to serving our teams in the following ways: construction projects, small group testimonies for our mom's, music ministry, childcare, VBS, and worship events.

Budget updates:

Thankfully we have been blessed by you, our ministry partners in completing this season. Without your generosity we would have been dead in the water! Thank you so much for your help!

Although we are a non profit entity in Costa Rica, they will only recognize us as a "For Profit Corporation" because we do not benefit the government explicitly. Because of this, our legal structure makes us liable for full tax exposure here. This year's taxes alone will total \$12,000.00. We get no breaks, or deductions, this comes straight out of the ministry. Yikes!

We have already begun our campaign to fund next season which begins in September. Our goal is to raise \$21,000.00 by September! This is the absolute bare bones cost to keep the school funded for five months, and we stretch every penny!! So far we are at \$5,000.00! Thank you!!
